These improved shears are the best all 'round, for nurserymen. For making cuttings we use the 8 inch, but for extra heavy work, cutting back seedlings to the bud, etc., the 9 inch is preferable. We have used this make of shears for eighteen years and our last importation is the best lot we have ever received.

# A Poor Cut of Our Good Packing House

This cut though a very poor one, will give you an idea of our Packing House and shipping facilities. Main line and side track from the N. C. & St. L. Railway on the right. The box car at left is standing on side track from the Southern Railway, two competing lines at our doors. Shipments loaded direct to car from packing room, no exposure, no wagon haul, no delay. Packing house is built of brick and built to stay—heavy walls, with air space, frost proof, slate roof—we believe there is no better equipment anywhere for quick action and good service. Give us a chance to demonstrate.

Yours very truly,  
CHASE NURSERY COMPANY.
